AEG welcome the acknowledgement that measures need to focus on renewable heating and the implications for transport as well as low carbon electricity. Given the seriousness of the need to reduce emissions, we consider that point 1 of the policy should be strengthened to require all new development across the District to be low carbon, rather than 'identifying suitable areas and opportunities of low carbon developments'. The Council's Homes & Neighbourhoods SPD should be referenced.

The policy should also address and support the importance of retrofitting and adapting the existing housing stock, commercial, industrial and public buildings to reduce emissions.

Please continue your comments on the next page.
